hydro draining technology

technical information

La tecnologia idro drenante

La tecnologia idro drenante, applicata ai cuscini, si fonda sulla capacità di drenare velocemente l'acqua e di consentire un continuo ed abbondante ricircolo di aria, al fine di ottenere un'asciugatura rapida dell'imbottito e di evitare l'insorgere di muffe o il deterioramento del prodotto.

Hydro draining technology

The hydro-draining technology applied to cushions, enable the water to drain out fast and makes for the continuous recirculation of plenty of air, so that the stuffing dries up quickly, avoiding the risk of mould formation and product deterioration.
